

CRX AIR

E-CYMBAL CONVERSION KITS by STEALTH

Compatible with Roland, Alesis and Pearl drum modules and the DDrum DDTi Trigger Interface, Stealth Cymbal Conversion Kits are a great way to add the the look and feel of real cymbals to any studio or live e-drum situation. Stealth is a world-leader in e-drum technology and their advanced, performance-proven triggers quickly install on CRX AIR Low Volume ride, crash and hi-hat cymbals. The kits feature premium-quality components and include easy-to-follow installation instructions.

3-ZONE RIDE*	2-ZONE CRASH	1-ZONE CRASH	2-ZONE HI-HAT	1-ZONE HI-HAT
				
\$120 includes clear edge guard *w/choke (2-jacks)	\$80 includes clear edge guard *w/choke	\$50 includes clear edge guard	\$100 includes Cymgard	\$70 includes Cymgard

Notes about Hi-Hats:

1. When using only the top cymbal as the Hi-Hat, the bottom cymbal can be used as an additional crash by purchasing the 1- or 2-Zone Crash Conversion Kit.
2. For a realistic Hi-Hat feel, a variety of stand/controller options are available, including:
 - Stealth "DIY" Hi-Hat Stand Conversion Kit (requires PDP HH820 stand and Roland FD-7 controller) - <https://goo.gl/fN2BpD>
 - Stealth 2-Leg "Plug-N-Play" Hi-Hat Stand (pre-assembled "DIY" kit) - <https://goo.gl/fN2BpD>
 - Pintech "HHC-RYC" Hi-Hat Controller (requires hi-hat stand) - <https://goo.gl/d8reCn>
 - Goedrum "GHC" Electronic Hi-Hat Controller (requires hi-hat stand) - <https://goo.gl/ea6V3U>
 - Alternate Mode KAT "eHat 2" (requires bass drum pedal) - <https://goo.gl/u1Urrx>
